MACHUPICCHU LUNA TOURS

Perolniyoc · Hike planner

Socma / Soqma • Perolniyoc • Raqaypata

Relieve / Terrain: SRTM–NASA, Mapzen. Ubicaciones / Locations: © OpenStreetMap.

One way: 2.2 km to the falls, then 1.1 km to Raqaypata. Confirm the trail in Socma.

1 Socma

Start at a pace you can sustain. Check how long you have to get back to your pickup point and ask about mud, diversions or restricted sections.

2 Perolniyoc Waterfall

Find a clear view of the cliff and notice how the water spreads as it hits the rock. Stay on the designated path and keep clear of wet rocks and edges.

3 Raqaypata

The archaeological site sits above the falls. Continue on the marked path if it is open, footing is good and you have time to descend. Notice how the buildings and walls make use of the slope.

What to pack and when to turn back

Bring water, shoes with good grip, a waterproof layer, sun protection and an offline map. If you have just arrived in Cusco, consider an easier outing first.

Return time / Pickup point: _____
